

Annex II, **SFDR** pre-contractual disclosure

01-2025

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

ASR Dutch Mobility Office Fund (the 'Fund')

Legal entity identifier:

7245004D9NV9P7SF4N72

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective: __%**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective: __%**

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0%¹ of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

¹ The Fund is not restricted to have a minimum percentage of sustainable investments. However, the Fund has sustainable investments as defined by the SFDR and EU Taxonomy. Please see page 6 for the percentages of sustainable investments of the Fund as at 30 September 2024.

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes various environmental and social characteristics which are set out in its ESG policy. The Fund’s vision on Environmental, Social and Governance (ESG) is to accommodate the interests of tenants and investors in the best possible way by creating and maintaining assets that have long-term value from both a financial and a social perspective, and to achieve this in a sound and responsible manner with engaged and aware partners and employees. To work towards these goals, the Fund has developed an Environmental, Social and Governance (ESG) strategy around three themes:

1. Environmental: Dedicated to decarbonisation
2. Social: Making a positive impact on society
3. Governance: Compliant with sustainability regulations

The Fund does not use a formal benchmark to compare its results with those of its peers. However, the Fund does report to the yearly GRESB survey, through which its ESG performance is measured and reported on.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators that are used to measure the attainment of the environmental or social characteristics promoted by the Fund are:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Strategic objectives 2025-2027

Strategic objectives	Target 2025	Target 2027
Environmental		
Energy intensity (kWh / sq.m. / year)	≤ 126	≤ 113
GHG intensity (kg CO ₂ / sq.m. / year)	≤ 4	≤ 3
On-site renewable energy (installed kWp)	≥ 400	≥ 700
Coverage of A labels (% of sq.m.)	≥ 85%	100%
Coverage of BREEAM Very Good or higher (% of sq.m.)	≥ 88%	≥ 89%
Coverage of BREEAM Excellent (% of sq.m.)	≥ 40%	≥ 45%
Climate change adaptation plans (% of properties with a (very) high risk profile)	100% prepared	100% executed
Enhance local biodiversity (% of sq.m. with an ecological asset plan)	≥ 50%	100%
Social		
Community & tenants		
Tenant satisfaction rating (score out of 10)	≥ 7.0	≥ 7.0
Green lease coverage for all lease agreements (% of sq.m.)	≥ 80%	100%
Shared mobility concepts (% of sq.m.)	≥ 50%	≥ 55%
Stimulating sustainable mobility (% of sq.m.)	≥ 40%	≥ 60%
Our employees		
Employee satisfaction rating (eMood® score)	≥ 7.5	≥ 7.5
Training & development (% of annual salaries)	≥ 1%	≥ 1%
Health & well-being (eMood® vitality score)	≥ 7.5	≥ 7.5
Governance		
Sound business practices	✓	✓
Alignment with sustainability guidelines	✓	✓
Contribution to SDGs	✓	✓
GRESB	★★★★★	★★★★★

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund promotes one of the climate and environmental objectives as included in article 9 of the Taxonomy Regulation, more specifically the objective 'climate change mitigation' and 'climate change adaptation'. The Fund promotes these objectives in its underlying investments, by promoting the stabilization of greenhouse gas concentrations in the atmosphere consistent with the long-term temperature goal of the Paris Agreement and promoting the resilience of its underlying investments to climate change.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

To ensure that the sustainable investment in which the Fund invests do no significant harm to any environmental or social objective, various environmental or social sustainability related subjects are monitored, more specifically the indicators for adverse impacts on sustainability factors applicable to real estate assets.

The do no significant harm principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Fund considers principal adverse impacts on sustainability factors as per its ESG Policy by measuring and monitoring the negative impact on sustainability factors. The adverse impact indicators on sustainability factors that the Fund considers are aligned with the ESG Policy and strategic areas of interest and are chosen taking into account materiality, data quality and availability. The following principal adverse impacts are taken into consideration in this statement for investments in real estate assets:

- i) Exposure to fossil fuels through real estate assets;
- ii) Exposure to energy-inefficient real estate assets;
- iii) Greenhouse gas emissions; and
- iv) Energy consumption intensity

i) Exposure to fossil fuels through real estate assets

The exposure to fossil fuels through real estate assets is measured via the share of real estate investments involved in extraction, storage, transport or manufacture of fossil fuels. The Fund has no exposure to fossil fuels.

ii) Exposure to energy-inefficient real estate assets

Exposure to energy-inefficient real estate assets is measured as real estate assets with an energy C-label or lower. As at 30 September 2024, 9.7% of the Fund's assets are inefficient real estate assets

iii) Greenhouse gas emissions

GHG emissions generated by real estate are measured as Scope 1, 2 and 3 emissions. As at 31 December 2023, the Fund's GHG intensity is 6 kg CO₂ per sq.m. per year. Coinciding with its net zero target, the Fund has set the objective to reduce its GHG emissions, achieving a net zero portfolio in 2045. Measured in kg of CO₂ equivalents per sq. m., achieving GHG neutrality ahead of its 2045 net zero target.

iv) Energy consumption intensity

Energy consumption intensity is measured as kWh of owned real estate assets per square meter. As at 31 December 2023, the Fund's Energy consumption intensity is 117 kWh / sq.m. / year. Coinciding with its net zero target, the Fund has set the objective to reduce the Energy consumption intensity, achieving a net zero portfolio in 2045.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

a.s.r. real estate is committed to the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. As such, a.s.r. real estate has implemented policies, processes and procedures to align with aforementioned guidelines which are frequently re-assessed.

As part of above-mentioned policies, processes and procedures a.s.r. real estate might apply (additional) procurement requirements and/or a code of conduct in respect of human rights, labour rights, environment and anti-corruption to contractors, property and facility managers when contracting with a.s.r. real estate. Where relevant such requirements are contractually imposed on sub-contractors. In addition, relations are screened and selected taking human rights criteria (amongst others) into consideration. Relations with negative impact on human rights are excluded where possible.

**Does this financial product consider principal adverse impacts on sustainability factors?**

Yes,

The Fund considers principal adverse impacts on sustainability factors by drawing up its own annual ESG policy which sets out specific sustainability objectives, including the Fund's considered adverse impacts on sustainability factors. The Fund's principal adverse impacts on sustainability are disclosed in the annual report.

No

**What investment strategy does this financial product follow?**

The strategy of the Fund is to buy, hold and unlock reversionary potential of real estate in the Netherlands. The focus of the portfolio is defined by sub-segments in the office market to secure the core character of the Portfolio. The investment policy focuses on a diversified Portfolio with regards to location, asset requirements, solvability of tenants and expiration date of lease agreements. This ensures long-term Portfolio quality.

The sequence of the areas reflects the priority of the investment strategy:

- Core investments: The focus of the Portfolio is on high-quality offices and (limited) other assets (e.g. parking) with a long-term stable income and low risk profile.
- High-mobility locations: Within 750 meters of an intercity train station, subway or tram station within the G5 cities.
- Defined office segments: Invest in Dutch office locations near public transport hubs. The focus of the strategy is on locations with international characteristics, situated in the G5 cities (target ≥100%).
- Asset requirements: The focus of the Portfolio is on a diversified and balanced mix of multi- and single-tenant offices. Maximum size of an asset in the Portfolio is 25%. The amount of large single-tenant buildings will be limited. Large buildings are defined as >15,000 sq.m. in the Randstad.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics, are the binding elements as reflected in the Environmental, Social and Governance policy of the Fund. The main consideration in the selection of investments are the ESG strategic objectives which can be found under the question “What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?”

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The Fund has made no commitment to reducing the scope of investments considered prior to the application of the strategy as set out above by a minimum rate. The Fund has real estate in its portfolio that does not yet meet the requirements as set out above. These real estate assets have objectives in order to meet the requirements or are part of the Fund’s sales list and will be sold.

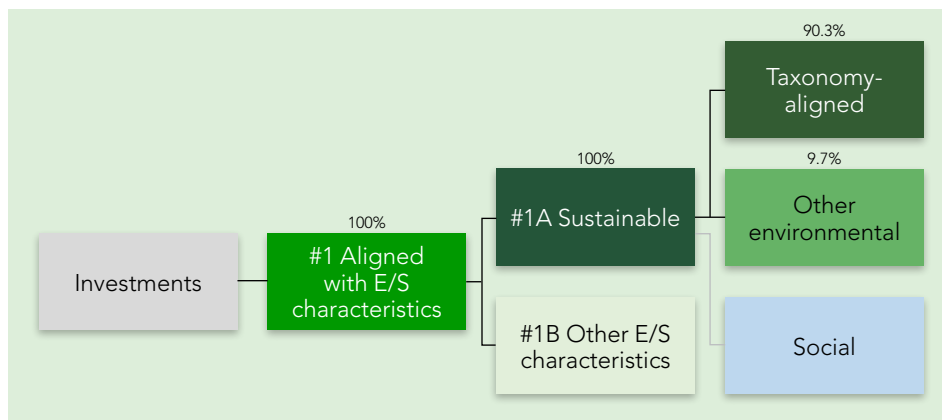

What is the policy to assess good governance practices of the investee companies?

Not applicable. The Fund does not invest in corporate bonds or shares of (listed) companies.

What is the asset allocation planned for this financial product?

The asset allocation of the Fund is 100% towards direct real estate assets. All assets of the Fund align with the E/S characteristics, since the Fund’s objectives apply to the entire portfolio. As at 30 September 2024, 100% of the Fund’s investments qualify as sustainable investments under SFDR (#1A), which includes Taxonomy-aligned assets and energy efficient real estate assets (PAI). 90.3% of the Fund’s investments qualify as Taxonomy-aligned. The Fund’s asset allocation towards the different boxes below is calculated as a percentage of the Fund’s Assets under Management.

90.3% of the Fund’s underlying investments are aligned with the technical screening criteria related to a substantial contribution to climate change mitigation’ due to the number of energy labels A or better and the fact that the economic activities do not significantly harm any other environmental objectives due to the limited physical climate risks. 9.7% of the Fund’s underlying investments that are not aligned with ‘climate change mitigation’ do contribute substantially to ‘climate change adaptation’, due to the limited physical climate risks and the fact that the economic activities do not significantly harm any other environmental objectives due to the energy labels B or C.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund does not use derivatives.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

As at 30 September 2024, 85.1% of the Fund's investments are aligned with the EU Taxonomy calculated over the Fund's turnover. The Fund calculated the percentage based on turnover, which represents the percentage of gross rental income coming from taxonomy-aligned assets. 85.1% of the Fund's underlying investments are aligned with the technical screening criteria related to a substantial contribution to climate change mitigation' due to the number of energy labels A or better and the fact that the economic activities do not significantly harm any other environmental objectives due to the limited physical climate risks. 14.9% of the Fund's underlying investments that are not aligned with 'climate change mitigation' do contribute substantially to 'climate change adaptation', due to the limited physical climate risks and the fact that the economic activities do not significantly harm any other environmental objectives due to the energy labels B or C.

As ESG is an integral part of the Fund's maintenance and capital expenditure plan, no distinction is made between the costs borne in light of taxonomy-alignment and other investments. Calculated over the Fund's assets under management, the Fund's Taxonomy alignment as at 30 September 2024 is 90.3%.

1. Taxonomy-alignment of investments

Percentage

Note: No break down including- and excluding Sovereign bond exposure is included in diagram, as the Fund does not invest in sovereign bonds.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy²?

- Yes:
- In fossil gas
 - In nuclear energy
- No

What is the minimum share of investments in transitional and enabling activities?

These are not applicable for the real estate investments of the Fund, as low-carbon alternatives are readily available (transitional) activities and there are no relevant targeted enabling activities.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

As at 30 September 2024, 9.7% of the Fund's investment are sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Fund has not set an objective for a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy

What is the minimum share of socially sustainable investments?

The Fund has not set an objective for a minimum share of socially sustainable investments. However, the Fund has set various social objectives for its portfolio. These objectives include the increase of tenant satisfaction & engagement, encouraging activities in inner cities and retail areas, green leases and employee satisfaction, well-being, health and development.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

None, as all the investments of the Fund are classified as investments that align with E/S characteristics.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This question is not applicable, as no specific index has been designated as a reference benchmark.

Where can I find more product specific information online?
