

Acquisition profile

ASR Dutch Science Park Fund

The ASR Dutch Science Park Fund managed by a.s.r. real estate, invests in commercial real estate located at the most prominent science parks in the Netherlands. The fund, with insurance company a.s.r. as its anchor investor, is focused on long-term core real estate investments. It currently holds assets at the TU Delft Campus, Biotech Campus Delft, Kennispark Twente and Leiden Bio Science Park. At the first three locations, the fund also has established cooperation agreements to support further development the science parks.

The fund is interested in both existing properties and new developments at 19 designated science parks. These include high-quality flexible offices spaces, (maker) labs, laboratories and research facilities. Buildings that support the local science park ecosystem, such as retail, healthcare facilities, and student or other types of housing- also fall within scope of interest.
